

**HOLONOMY REPRESENTATION OF  
QUASI-PROJECTIVE LEAVES OF CODIMENSION ONE  
FOLIATIONS**

BENOÎT CLAUDON, FRANK LORAY, JORGE VITÓRIO PEREIRA, AND  
FRÉDÉRIC TOUZET

**Abstract:** We prove that a representation of the fundamental group of a quasi-projective manifold into the group of formal diffeomorphisms of one variable either is virtually abelian or, after taking the quotient by its center, factors through an orbicurve.

**2010 Mathematics Subject Classification:** 37F75, 14F35.

**Key words:** Quasi-projective groups, holonomy representations.
